

Know where everything is. Always.

Hati Aero is a worldwide asset tracking device that enables the user to track their assets on international routes, especially within - but not limited to - airplanes. So any assets shipped by airplane (i.e. ULD's) are best matching combination on this device.

Ensure Timely Availability

Reduce Idling Time

Plan Timely Maintenance

Instantly Locate All Your ULD's and Catering Trolleys

Reduce Costly Replacement

Automated Inventory Checking

Fit. Track. Relax.

-  In-Flight
-  GPS Localization
-  WiFi Localization
-  BLE
-  NB-IoT Interface
(incl. cellular positioning)
-  Smart Motion Algorithm
-  Easy installation
-  Orientation Detection
-  Temperature Sensing
-  Indoor Tracking (via BLE)
-  3+ years of battery lifetime
-  Remote Configuration
-  Industrial Strength IK09
-  Shock Detection
-  Data Recovery
-  FOTA Update
-  IP 69

In cooperation with
sensolus

Web-based application

Provides full functionalities,
administration and extensive analytics

Mobile and tablet app

Focuses on the major functions you
need on the road and on site

Certifications
CE/FCC/DO-160
