

BLE Asset Tags

Bluetooth tag tracking offers a budget-friendly solution for monitoring lower-value or smaller assets, relying on HATI Wired or BluLink, to detect assets' locations, making them ideal for tracking when assets are in-transit or within specific warehouse zones.

Please contact Alps Alpine for more information.

ALPSALPINE

extends your senses

Skoll Load Detection and Fill Level BLE Sensor

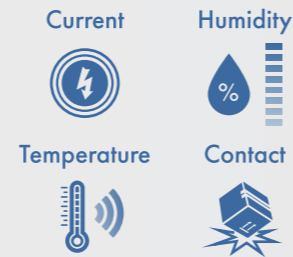

Key Features

- +5 years Battery Life at Default Settings
- IP67 / IK05 Rating
- Object/Presence Detection using Radar
- Bluetooth Connectivity (BLE)
- Easy installation
- Temperature Sensor
- Remote Configuration
- Orientation Detection

Other BLE Condition Sensors

For use with BLE Sensor support products, BLE condition sensors such as for distance, humidity, contact, temperature and current detection are available.

Please contact Alps Alpine for more information.

Asset Tracking Solutions

Key Features

Rugged, easy-to-install, and cost-effective trackers that provide direct internet connectivity for your assets. Ideal for situations without wiring (except Hati Wired), these trackers are fully customizable to fit your specific needs.
